

## 10-Hectare Development Project

We are humbled and grateful to have received a donation of 10 hectares of land—a tremendous blessing that will serve as the foundation for a vision far greater than ourselves.

Our dream is to create a vibrant, sustainable community hub that will transform lives through education, faith, care, and development.

### 10-Hectare Development Project will include:

- **School:** Providing quality education to children from early learning through primary and secondary levels, empowering them with knowledge, values, and hope for a brighter future.
- **Church:** A place of worship and spiritual growth, serving as the heart of the community where faith and fellowship unite.
- **Community Centre:** A safe and welcoming space for training, outreach, and community gatherings, fostering connection and support among families.
- **Autism Centre:** In partnership with Els for Autism Foundation, this centre will offer specialized training and support for children with autism, as well as resources for parents and teachers to break stigmas and build inclusion.
- **Agriculture:** A sustainable farming program to teach practical skills, promote food security, and create income opportunities for local families.
- **Sports Facilities:** Including a soccer field and swimming pool, providing healthy recreation and youth development opportunities that build teamwork, discipline, and confidence. This development will serve as a beacon of hope—building people, nurturing potential, and strengthening the next generation. With the help of partners, donors, and volunteers, we are laying the foundation for lasting transformation in Eswatini.
